Kajal Kumari
Full Stack Web Developer

PROFESSIONAL SUMMARY

An aspiring Full Stack Web Developer driven by a passion for crafting efficient, user-centered applications. With expertise in Java, JavaScript, and front-end technologies, I focus on delivering seamless, innovative solutions. I thrive in collaborative environments and approach every challenge as a chance to grow. Committed to continuous learning, I aim to stay at the forefront of development. Let's connect and build the future together through code.

PROJECTS

1. Task Manager | 🌐 | ⭘
Java | Spring boot | MySql

- Designed and developed server-side APIs using Java Spring Boot to handle task management operations.
- Utilized MySQL to create and optimize database models and queries for managing user-related tasks efficiently.
- Created functionalities for users to create, update, complete, reassign and delete tasks.
